Skills:

- HTML
- CSS
- JavaScript
- React
- Phyton
- Git

Language:

- english ●●○○○

Experience:

Aegon Hungary - Financial Advisor 2021-

I used to work as a financial advisor, but I decided to change careers. This is how Front-End development came into my life. In the past year, I learned a lot and built my knowledge. While writing my projects, I learned how to design an application and what main aspects to consider. From the beginning, it is important that my codes are written based on clean code principles. Due to my previous position, I was in constant online and/or personal contact with my clients, which is why communicating with others is not a problem.

Professional projects

Exam Preparation Web App
The program helps you prepare for the exams
- mainly intended for students who:
    - they like to track their progress precisely
    - user-friendly interface
- React, HTML, CSS, JavaScript
- more info: https://github.com/cintia-sari/exam-preparation-react
